# HRM Update Summary

Date: May 25, 2026

1. What was fixed
- Payroll calculations were improved to reflect the correct month end and up-to-date tax rules.
- The payroll engine now applies the correct contribution formula used for CRA and ensures pension and NHF a
- The payroll updates now store a clearer breakdown of deductions and net pay for better review and audit.
- Auto-graded goals were confirmed and strengthened so goal achievements can now be evaluated automatica

2. What this means for the team
- Payroll processing will generate more accurate payslip values and reduce the risk of under- or over-deduction
- HR managers can trust that the tax and benefits calculations are aligned with the current rules.
- Goal performance tracking is now more reliable, with automatic grading of completed objectives rather than m

3. How to use the new updates
- Payroll generation is run for active staff and will now use the full month period automatically.
- Tax and benefit settings are managed centrally so any policy updates are reflected across all future payroll ru
- The auto-graded goals process will evaluate goals using the configured performance criteria and store results

4. Recommended next steps
- Review the first payroll run after this update to confirm the generated payslips match expected deductions.
- Keep the central tax and pension settings current so the payroll engine continues to apply the right rates.
- Monitor goal completion reports to validate the auto-grade results and adjust criteria as needed for business g

5. Benefits for leadership
- Better payroll accuracy for staff and finance teams.
- Reduced manual effort in goal performance evaluation.
- Stronger alignment between payroll, tax, and HR performance management.
