1. Getting Started

What is the Payroll System?

The Payroll System helps you manage employee payslips efficiently. You can send payslips to multiple employees at once, mark them as paid, and automatically email them to staff—all in one place.

Where do I find the payroll tools?

Look for the green toolbar buttons at the top of the payroll list:

- **Send Payslips** – Email payslips to employees
- ✓ **Mark As Paid** – Mark payslips as paid and optionally email them

Before You Start

Make sure you have at least one payroll record for the period you're working with. You should be logged in as an HR Administrator.

2. Sending Payslips to Employees

What does this do?

Sends a payslip document to an employee via email. You can send to one person, a whole department, or everyone at once.

Step-by-Step Instructions

Step 1: Go to the Payroll page and view your payslip list

Look at the list of all payslips for the current period.

Step 2: Choose which payslips to send

You have three options (see next section for details).

Step 3: Click the **■ Send Payslips** button

A popup window will appear.

Step 4: Select your scope and confirm

Choose from 'Selected', 'By Department', or 'All Payslips'.

Step 5: Wait for confirmation

You'll see a message saying how many payslips were queued to send.

Choosing Your Sending Scope

Scope	What It Does	When To Use
Selected Payslips	Sends to only the payslips you checked on the list	When you want to send to 2-3 specific people
By Department	Sends to all payslips from one department (e.g., Finance, HR, Sales)	When you want to send to an entire team
All Payslips	Sends to every payslip in the current period	When you want to send to everyone at once

■ Tip: Selecting Individual Payslips

To send to specific people, check the boxes next to their names in the payroll table, then click **■ Send Payslips** and select "Selected Payslips".

3. Marking Payslips as Paid

What does this do?

Updates the payslip status from 'Pending' to 'Paid' in the system. This records that you've released the payment to the employee. Like sending payslips, you can do this for selected staff, a department, or everyone.

Step-by-Step Instructions

Step 1: Select payslips to mark as paid

Either check boxes or select a department/all.

Step 2: Click the ✓ **Mark As Paid** button

The button is green and located next to 'Send Payslips'.

Step 3: Choose your scope

Same three options: 'Selected', 'By Department', or 'All Payslips'.

Step 4: (Optional) Check the email option

See Section 4 below for details.

Step 5: Confirm

Click 'Mark as Paid' to complete the action.

Step 6: Verify completion

The payslip list will refresh, and the status should show 'Paid'.

Status Labels

Status	Meaning
Pending	Payslip created but not yet marked as paid
Paid	Payment has been released to the employee
Cancelled	Payment was cancelled

4. Sending Email When Marking as Paid

What does this do?

When you mark payslips as paid, you have the option to automatically send the payslip document to employees via email at the same time. This is optional.

How to Use

1. Click ✓ Mark As Paid
2. Select your scope (Selected, By Department, or All)
3. Look for the checkbox that says: **'Also email payslip after marking as paid'**
4. Check the box if you want to email payslips
5. Click 'Mark as Paid'

When Should I Use This?

- ✓ When you've just released the payment and want to notify employees immediately
- ✓ When you haven't already sent payslips earlier in the month
- ✗ When you already sent payslips separately (don't send twice!)
- ✗ If you prefer to send payslips at a different time from marking as paid

■ Tip: Two-Step vs. One-Step

Two-step process: First send payslips with '■ Send Payslips', then later mark as paid with '✓ Mark As Paid' (without email). This is useful if you want to give employees a few days' notice before marking as paid.

One-step process: Use '✓ Mark As Paid' with the email option checked to do both in one action. Faster and simpler if timing doesn't matter.

5. Tips & Troubleshooting

Common Questions

Q: What if I accidentally mark a payslip as paid?

A: Contact your HR Administrator. They may be able to change the status back to 'Pending' if needed.

Q: How do I know if an email was sent successfully?

A: The system will show a confirmation message. If there's an error, you'll see an alert with more details.

Q: Can I send to multiple departments at once?

A: Not in a single action. Use 'All Payslips' to send to everyone, or send to each department separately.

Q: What if a payslip row is disabled or grayed out?

A: It may have already been marked as paid, or there might be an issue with the payslip data. Contact HR support if you're unsure.

Q: Can I undo an action?

A: Once you click the button and see the confirmation, the action is processed. Email actions cannot be undone, but status changes may be reversible—ask your HR Administrator.

Q: Why do some buttons appear disabled?

A: Buttons become disabled when the required selections aren't made (e.g., 'Send Payslips' is disabled if you haven't selected any payslips in 'Selected' mode).

Best Practices

- Always double-check your selection before clicking any button.
- Send payslips early in the month so employees have time to review before the payday.
- Mark payslips as paid only after confirming payments have been made.
- Keep a record of when you sent payslips and marked them as paid.
- If you're new to this system, start with 'Selected' scope to practice with one or two payslips.
- Contact HR Admin if you see error messages or unexpected behavior.
