1 · Executive Summary & Platform Overview

What Everywin Is

Everywin is the modern HR infrastructure OS for organisations in emerging economies. It powers payroll, compliance, workforce management, and the entire people operations stack — from hiring and onboarding to salary payments, benefits, and employee management — seamlessly across multiple countries and regulatory environments.

The 9-Hub Architecture

Everywin is structured around nine integrated hubs, each owning a distinct domain of people operations:

Hub	Name	Core Capabilities
Hub 1	Recruitment	ATS, pipeline, talent pool, candidate chat, bulk email
Hub 2	People & Org	Employee directory, bio-data, org chart, departments, D&I;
Hub 3	Time & Attendance	Check-in/out, timesheets, geofencing, shift scheduling
Hub 4	Leave Management	Requests, approvals, accrual, balances, policies
Hub 5	Performance & Growth	Scoring engine, OKRs, PIPs, 360° reviews, skills matrix, succession
Hub 5B	Learning & Growth	Training hub, onboarding checklists, probation tracker
Hub 6	Compensation & Benefits	Payroll engine, Anchor disbursement, local tax & statutory deductions, bonuses, expenses
Hub 7	Engagement & Culture	Announcements, kudos, surveys, policy library, internal job board
Hub 7B	Universal Messaging	Real-time DMs, group chats, voice notes, full media, role-based access
Hub 8	Documents & Compliance	Contracts, HR letters, grievances, disciplinary, assets, documents vault
Hub 9	Administration	Reports, offboarding, audit logs, system users, settings

Key Differentiators

Anchor-powered payroll disbursement	Salaries disburse automatically to staff bank accounts. Zero manual transfers once configured.
Full statutory compliance — per country	Income tax (PAYE/WHT equivalent), pension/provident fund, housing fund, health insurance, workplace insurance — computed automatically per the applicable jurisdiction on every payroll run.
Three-tier RBAC	Staff, Manager, and HR Admin portals each surface only the data and actions their role is entitled to.
Universal Messaging System	Full-featured internal communication layer — DMs, groups, voice notes, media — embedded across all portals.
Multi-tenant isolation	Every registered organisation gets a fully isolated OS. No data cross-contamination between organisations.
Self-service onboarding	Any HR team can configure their environment, invite staff, and run their first payroll in under 30 minutes.

2 · Platform Architecture & Multi-Tenancy

Everywin is a multi-tenant SaaS platform. Each registered organisation receives an isolated operating environment (referred to as the 'Everywin OS'). All tenant data is partitioned at the database level using an `organisation_id` foreign key on every record. No tenant can access, view, or infer data belonging to another tenant. Row-level security is enforced at the database level — not only in application code.

Tenancy Model

Organisation Registration	Any company registers via the public sign-up page. On approval, their OS is provisioned automatically.
Data Isolation	Every record is tagged with <code>organisation_id</code> . Queries are scoped to the authenticated org at the database level.
User Accounts	Each staff member gets a platform user account linked to their employing organisation. A user cannot log into another org's OS.
Anchor Integration	Each organisation connects their own Anchor funding account. Payroll funds are never commingled across tenants.
Subdomain / OS Identity	Each org OS is accessible via a unique URL or organisation identifier resolved at login.
Ads Platform	Everywin's Ads Platform operates cross-tenant — ads are served to all users, but advertiser targeting is aggregated and anonymised.

3 · Organisation Onboarding Flow

The onboarding flow is the first product experience for every HR Admin. It must be frictionless, fully self-service, and complete within 30 minutes for a typical organisation of 50–200 staff. It is structured in three phases: Organisation Setup, Team Population, and Payroll Configuration.

Phase 1 — Organisation Registration & Setup

Step 1 · Registration	HR Admin visits the Everywin sign-up page and enters: company name, industry, company size range, contact name, work email, phone number, and password. Email verification is required before access is granted.
Step 2 · Company Profile	After verifying their email, the HR Admin completes the company profile: registered address (country, state/province), logo upload, company description, and default timezone. This data is used for compliance reporting and ad targeting.
Step 3 · Organisation Structure	HR Admin creates departments (e.g. Sales, Operations, Finance, Marketing, HR). At least one department is required before staff can be added. Departments can be added, renamed, and deactivated at any time.
Step 4 · Leave & Policy Defaults	The system pre-loads statutory leave defaults appropriate to the organisation's country. HR Admin reviews and adjusts entitlements per employment type and sets leave accrual rules in line with local law.
Step 5 · Payroll Configuration	HR Admin sets payroll frequencies (monthly for full staff and contractors; weekly for onsite/labourers). Local statutory tax and deduction schedules are pre-configured per the selected jurisdiction. HR Admin reviews and adjusts income tax rates, pension/provident fund rates, housing fund eligibility, and withholding tax rates.
Step 6 · Anchor Connection	HR Admin connects the company's Anchor account by entering API credentials and designating the funding account. The system validates the connection by performing a test lookup. Disbursement schedule and approval rules are set.

Phase 2 — Staff Population

Option A — Manual Add	HR Admin adds staff individually from the 'Employees' section. Required fields: full name, work email, department, employment type (Full Staff / Contractor / Onsite), job title, base salary, employment start date, and line manager. The system creates a user account and sends a login invitation email automatically.
Option B — Bio Data Link	HR Admin generates a tokenised bio-data collection link and sends it to each new hire. The staff member completes the form (personal details, guarantor details, bank account, government ID) from any device. HR reviews and approves each submitted section.
Option C — Bulk Import	HR Admin uploads a CSV of staff records matching the Everywin template. The system validates each row and flags any errors before committing the import. Invitation emails are sent in bulk on successful import.
Staff Account Activation	Every new staff member receives an email with their login credentials. On first login, they are prompted to: set a new password, review their profile, complete any outstanding bio-data, and review the company's onboarding checklist (if configured by HR).
Guarantor Collection	For each new hire, HR generates a tokenised guarantor link. Guarantors submit their details and supporting documents without creating a platform account. HR reviews and approves or rejects each guarantor submission independently.

Phase 3 — First Payroll Run

Salary Verification	HR Admin reviews the salary attached to each staff member's profile before the first run. Any discrepancies are corrected from the staff profile screen.
Bank Account Verification	Each staff member's bank details (bank name, account number) must be entered and verified via Anchor's account name lookup before they can receive a disbursement. Staff can enter their own details via their profile; HR can also enter them directly.
Draft Payroll Review	HR Admin triggers the first payroll run. The system generates a full draft showing each staff member's gross pay, all statutory deductions, and net pay. HR reviews the draft before approving.
Approval & Disbursement	HR Admin approves the payroll run. If a two-person authorisation rule was configured, a second Admin must also approve. On final approval, Anchor disburses net salaries to all staff bank accounts automatically.
Staff Notification	Each staff member receives an in-app and optional email notification confirming their salary has been disbursed, including the amount and their registered bank account.

4 · Role-Based Access Control (RBAC)

Everywin enforces a strict three-tier RBAC model. Access is enforced at the API and database level — never UI-only. Role assignments are logged in the audit trail. A user can hold multiple roles (e.g. a line manager who is also an HR Admin), but each role's permissions are additive.

Permission Matrix

PART A

STAFF PORTAL

Self-service access for every team member

The Staff Portal is the self-service face of Everywin. Every employee — whether full-time, contractor, or onsite labourer — has a dedicated view showing exactly what they need without requiring HR intervention for routine queries. The portal is designed mobile-first and accessible from any device.

A.1 — Staff Dashboard

The dashboard is the staff member's home screen. It surfaces their most important real-time data at a glance, reducing the need to navigate deep into sub-sections for routine checks.

Dashboard Widgets

Performance Score Card	Live composite performance score (0–100) with colour coding: 80–100 Elite (green), 60–79 Stable (amber), below 60 Needs Improvement (red). Shows rank within department if applicable.
Leave Balance Summary	Remaining annual leave days, sick leave days, and any other leave types configured for the org. Tappable — links directly to the Leave section.
Attendance Check-In Widget	One-tap check-in and check-out. Displays current attendance status (Present, On Leave, Absent). Shows today's check-in time after clocking in.
Pending Tasks Counter	Count of open tasks assigned to the staff member with a direct link to the Task Manager.
Upcoming Shifts	Next scheduled shift(s) for the week pulled from the shift schedule.
Latest Announcements	The two or three most recent company or department announcements, with a link to read more.
Pending Peer Reviews	Badge count of peer review requests awaiting the staff member's response.
Salary Disbursement Status	Most recent payslip status: 'Salary of ■X disbursed on [date]' or 'Payroll for [month] pending'. Links to My Payroll.
Ads Banner (Dashboard)	Ad unit served at the top of the dashboard. Maximum 3 unique ads per user per day. Marked as 'Sponsored'. Staff can hide or report any ad.

A.2 — My Profile & Bio Data

Profile Sections

Personal Information	Full name, date of birth, gender, marital status, phone number, home address, state/province of origin, nationality, religion (optional). Staff can edit: phone, home address, next-of-kin details, emergency contact.
Employment Details	Start date, employment type, department, job title, line manager, base salary (visible but not editable by staff). Changes to sensitive fields go through an HR Request.
Bank Account Details	Bank name and account number linked for payroll disbursement. Staff can add or update their bank account. Changes require HR review before taking effect on the next payroll run.
Identification	Local tax identification number and bank/identity verification number — visible to staff, not self-editable. Changes via HR Request only.

CV & Qualifications	Educational history, certifications, and skills. Staff can add and update their own qualification records.
Documents	Staff can view documents shared with them by HR (e.g. signed contract, offer letter). Upload personal documents where HR has enabled this.
System Notes	HR-internal notes on the staff member. Not visible to the staff member.

Bio Data Collection Form

HR sends each staff member a tokenised link to complete their bio-data form. The form is organised into three sections: Employee Details (personal and employment information), Guarantor 1, and Guarantor 2. Each section is submitted independently and reviewed by HR. Staff see the submission status of each section (Pending, Under Review, Approved, Returned for Correction) in their My Bio Data screen.

A.3 — Attendance & Timesheets

Check-In / Check-Out	One-tap check-in and check-out from the staff portal. The system records timestamp, IP address, and device type. Optional GPS capture for organisations using geofencing. Late arrivals are automatically flagged.
Attendance History	Staff can view their own attendance record for any date range: Present, Late, On Leave, Absent. Shows check-in and check-out times per day.
Timesheet Entry	Staff log daily or weekly work hours against tasks or projects. Timesheets are submitted to their line manager for approval. Status tracking: Draft, Submitted, Approved, Rejected.
Timesheet History	Full history of all submitted timesheets with approval status and any rejection notes from the manager.
Calendar View	Staff see their own calendar overlaid with attendance records, approved leave, scheduled shifts, and company-wide events.

A.4 — Leave Management

Submit Leave Request	Staff select leave type (Annual, Sick, Study, Maternity, Paternity, Compassionate), start date, end date, and reason. The system auto-calculates working days, checks remaining balance, and flags any overlap with approved leave or public holidays before submission.
Leave Request Status	Real-time status of all leave requests: Pending, Approved, Rejected, Cancelled. Rejection includes the reason from the approving manager or HR.
Leave Balances	Real-time view of entitlement, days taken, and days remaining per leave type. Updated instantly when a leave request is approved.
Leave Policies	Read-only view of the organisation's configured leave policies: entitlement per type, accrual method, carry-over rules.
Leave Accrual	Monthly accrual credits are shown per leave type. Staff can see how their balance has accumulated month-by-month.
Public Holidays	Statutory public holidays for the organisation's country are pre-loaded and excluded from leave day counts. Staff can view the holiday calendar for the year.

A.5 — Performance & Goals

Staff have full transparency into how they are measured. The performance section surfaces their composite score, the breakdown behind it, their goals progress, and their trajectory over time.

Composite Score	Live composite performance score (0–100) broken into three pillars: KPI Goals Achievement (40%), Work Quality (20%), Manager Review (40%). Each pillar score is visible alongside the composite.
------------------------	--

6-Month Trend Chart	A line chart showing the staff member's composite score over the past six months. Identifies trajectory: improving, stable, or declining.
Goals & OKRs	All goals set for the current period are listed with: the target, the current actual, the percentage achieved, and the deadline. Goals are role-specific and set by HR or the manager.
Manager Review Score	The manager's submitted review score for the current period is visible. Staff can see the total score but not individual sub-category notes (which remain HR-visible only).
360° Peer Reviews	Staff can see peer review assignments: who they are asked to review, and the deadline. After submission, they can see anonymised aggregated feedback they have received. Individual reviewer identities are not revealed.
Improvement Plans (PIPs)	If a PIP has been initiated, the staff member can see: the concern area, improvement targets, milestones, support offered, and current status. PIPs are read-only for staff.
Skills Matrix	Staff can view their own skill ratings across the competencies defined for their role. Updated by their manager after review cycles.

A.6 — Learning & Growth

Training Programmes	Staff see all training programmes assigned to them: title, format (internal, external, online), associated documents, and completion status. Staff mark individual modules complete.
Compliance Training	A dedicated tab for mandatory training (data protection, workplace safety, anti-bribery). Shows completion deadlines and overdue alerts.
Onboarding Checklist	New hires see their onboarding checklist on first login: document submission, IT setup, induction sessions, policy acknowledgements. Each item shows the responsible party, deadline, and completion status.
Probation Status	New hires on probation can see their probation start and end dates, remaining days, and current status (Active, Completed, Extended, Terminated).
Internal Job Board	Staff can browse all internally posted open roles and submit applications. Application status is tracked: Submitted, Under Review, Shortlisted, Rejected, Hired.

A.7 — My Payroll & Bonuses

The payroll section gives staff complete visibility into their compensation without needing to contact HR. Every payslip is downloadable as a PDF and shows the full statutory deduction summary.

Payslip List	All payroll periods listed in reverse chronological order. Each entry shows: period, gross pay, total deductions, net pay, disbursement status (Pending / Disbursed), and Anchor reference number.
Payslip Detail	Full payslip breakdown: gross earnings, all deductions itemised (income tax, pension/provident fund, housing levy, withholding tax where applicable), total deductions, net payout, annual taxable income used in tax computation, relief allowance applied, and disbursement status.
Payslip Download	Each payslip is downloadable as a PDF from the payslip detail view.
Salary Disbursement Notification	Staff receive an in-app notification when their salary is disbursed: 'Your salary of ■[amount] for [month] has been disbursed to your [Bank] account ending [last 4 digits].'
My Bonuses	All logged bonuses and commissions: type (Performance, Annual, Spot Award, Commission), amount, period, and disbursement status. Shows whether each bonus has been disbursed via Anchor.
Expense Claims	Staff can submit expense claims: amount, category, description, and receipt upload. Status tracking: Submitted, Under Review, Approved, Rejected, Disbursed.
Benefits Summary	Staff can view their configured benefits package: health insurance plan and provider, vehicle allowance, data allowance, and any other benefits logged by HR.

A.8 — Engagement, Culture & Messaging

Announcements	Company-wide and department-specific announcements from HR. Normal, Important, and Urgent priority levels. Pinned announcements stay at the top of the feed. Native ad posts are interspersed (max 1 per 5 organic posts), clearly labelled 'Sponsored'.
Recognition Wall (Kudos)	Any staff member can recognise a colleague publicly with a message and category (Teamwork, Innovation, Client Excellence, Going Above & Beyond). Posts appear on the company wall visible to all staff.
Surveys	HR-published pulse surveys and eNPS. Staff complete surveys directly from their portal. Anonymous surveys are flagged — staff are reminded their identity will not be linked to their response.
Remote Work Log	Staff log and track their remote work days. Can see their weekly usage against any manager-configured maximum.
Policy Library	Read-only access to all company policies uploaded by HR. Staff acknowledge each policy individually — HR tracks acknowledgement status.
Direct Messages (DMs)	Staff can start a private one-on-one conversation with any other platform user. Supported: text, images, videos, documents, voice notes, emoji reactions. Notification badge shows unread count.
Group Chats	Staff can create group chats and add multiple members. Can see only groups they are a member of. Supported: group name, group avatar, pin important messages, mute notifications per group.
Message History & Search	Staff can search their own message history by keyword, sender, or date range.

A.9 — Documents, Requests & Compliance

Documents Vault	Staff see documents explicitly shared with them by HR: signed contracts, offer letters, certificates, policy documents. Download available for shared documents.
HR Letters	View issued HR letters: offer letter, employment confirmation, salary review letter, promotion letter. Downloadable as PDF.
HR Requests	Staff raise operational HR requests: payslip reissue, reference letter, employment confirmation, address update, department transfer, role clarification. Status tracking: Open, In Progress, Resolved.
Grievances	A confidential channel for formal complaints. Default is anonymous — the link between submitter and submission is severed on save (cryptographic anonymisation). Named submissions are also supported. Status updates are visible to the staff member.
My Flags (Disciplinary)	Staff can view their own disciplinary record: incident date, severity level (D through A), and current status. They cannot see HR's internal notes.
My Guarantors	Staff can access the tokenised guarantor form link and track guarantor submission status (Pending, Submitted, Under Review, Approved, Returned).
My Tasks	View all tasks assigned to the staff member. Mark tasks as complete. Overdue tasks are highlighted.
Contracts (Shared)	Employment contracts and other documents that HR has made visible to the staff member. Read-only. Private documents (e.g. disciplinary notices) are not shown.

PART B

MANAGER PORTAL

Team-level visibility and management for line managers & team leads

The Manager Portal gives line managers everything they need to run their team efficiently — attendance oversight, leave approvals, performance reviews, goal-setting, and incident management — without exposing organisation-wide HR data. Managers see their direct reports only, unless explicitly granted broader access by HR.

B.1 — Team Dashboard

Team Summary	Direct reports headcount, active vs. on-leave today, absent today. One-line status for each direct report.
Average Team Performance Score	The team's average composite performance score for the current month, with trend vs. previous month.
Pending Leave Requests	Count of leave requests awaiting manager approval, with a quick-approve workflow directly from the dashboard.
Pending Timesheet Approvals	Count of timesheet submissions awaiting approval.
Active PIPs	Count of active Performance Improvement Plans in the manager's team.
Team Attendance Today	Breakdown of today's attendance across the team: Present, Late, Absent, On Leave.
Upcoming Shifts	The next 7 days of shifts for the manager's team in a compact calendar strip.
Messages Unread	Unread DM count and group chat badges for the manager.
Dashboard Ad Banner	Ad unit served at top of screen. Manager-tier ads are targeted to managerial and decision-maker segments.

B.2 — My Team

Team Directory	Full list of direct reports with: name, role, department, employment type, performance score, current status (Active, On Leave, Probation). Searchable and filterable.
Individual Staff Profile (Read)	Managers can view the profiles of their direct reports: bio-data, employment details, performance history, goals, leave history, and disciplinary flags. Cannot edit salary, tax details, or HR-internal notes.
Org Chart	Company-wide org chart accessible to managers. Useful for understanding cross-team reporting lines and headcount context.

B.3 — Time & Attendance

Team Attendance Overview	Daily attendance status for all direct reports. Filter by date range, status (Present, Late, Absent, On Leave). Export as CSV.
Late Arrival Alerts	Automatic flag when any direct report arrives late. Manager sees the flagged records in the attendance view.
Timesheet Review Queue	All timesheets submitted by direct reports awaiting approval. Approve or reject individually or in bulk. Rejection requires a note.

Shift Scheduling	Create, assign, and publish shift schedules for direct reports. Support for rotating, fixed, day/night patterns. Published shifts appear in staff calendars immediately.
Team Calendar	Shared calendar view for the manager's team: attendance records, approved leave, shifts, public holidays, and HR events.
Holiday Calendar	View the annual public holiday calendar. Public holidays are automatically excluded from leave calculations.

B.4 — Leave Approvals

Leave Request Inbox	All pending leave requests from direct reports. Each request shows: staff name, leave type, date range, working days requested, remaining balance, and reason.
Approve / Reject with Note	Manager approves or rejects. Rejection requires a reason which is communicated to the staff member.
Team Leave Calendar	A calendar view showing all approved leave across the manager's team. Helps identify resource conflicts before approving new requests.
Leave Balances (Team)	View remaining leave balances for all direct reports across all leave types.
Leave Policies (Read)	Read-only access to the organisation's leave policies to ensure approval decisions are compliant.

B.5 — Performance Management

Team Performance Scorecard	Overview of all direct reports' current composite scores, colour-coded. Sortable by score, name, or department. Highlights staff below 60 who may need a PIP.
Manager Review Submission	For each direct report, the manager enters scores across defined review dimensions. The system weights the input and factors it into the composite score. Review periods are set by HR.
Goals & OKRs — Set & Adjust	Managers set monthly or quarterly goals per direct report, selecting the appropriate KPI template for their role. Actuals are auto-populated at period end from source data. Managers can adjust targets mid-period with a reason logged.
Performance Improvement Plans	Managers initiate PIPs for direct reports scoring below the threshold. Each PIP captures: concern area, improvement targets, support offered, review milestones, and expected outcome. HR is notified when a PIP is initiated.
360° Peer Reviews	Managers can initiate peer review cycles for their direct reports. Assign reviewers, set deadlines. See full reviewer breakdown. Participate in peer reviews themselves as a reviewer.
Skills Matrix Updates	Managers update skill ratings for direct reports after review cycles. The matrix maps each staff member against the competency framework for their role.
Succession Planning	Managers nominate direct reports as successors for key roles. Each nomination captures: target role, nominated staff, readiness rating, and estimated readiness timeline.

B.6 — Disciplinary & Incident Logging

Log Incident	Managers can log disciplinary incidents for direct reports with: date, description, severity level (D–A), and supporting evidence. Incidents are stored against the staff record.
Severity Levels	Grade D: Verbal counselling (noted on record). Grade C: Formal written warning. Grade B: Written warning + PIP initiation triggered. Grade A: Formal disciplinary action — HR is immediately notified.
Incident History	View all incidents logged for each direct report. Accumulated incidents trigger automatic alerts to HR.
HR Escalation	Grade A incidents auto-notify HR Admin. Managers cannot close Grade A incidents without HR sign-off.

B.7 — Succession Planning & Skills Matrix

Succession Nominations	Managers can nominate direct reports as potential successors for any role designated as critical by HR. Each nomination records: target role, nominee, readiness rating (1–4), estimated readiness timeline, and development notes.
Skills Matrix View	Managers see the skills matrix for their entire team — all staff mapped against the role competency framework. Cells are rated Novice / Developing / Proficient / Expert. Managers update ratings after each review cycle.
Skill Gap Identification	The matrix view highlights gaps: cells below 'Proficient' are flagged. Managers use this to identify training needs and inform succession decisions.

B.8 — Messaging & Engagement

Direct Messages	All DM capabilities as described in the Staff Portal. Managers can message any platform user.
Group Chats	Managers can see all group chats that include any member of their direct team — not just groups they personally belong to.
Message Search	Managers can search within their team's conversations. Search scope: all chats involving any of their direct reports.
Announcements	Read and receive company-wide and department announcements. Cannot publish announcements (HR-only capability).
Recognition	Give kudos to team members and across the organisation. See team recognition posts on the company wall.
Surveys	Respond to HR-published surveys. See team survey completion rates (not individual responses) if HR grants this visibility.
Policy Library	Read and acknowledge company policies. Same access as staff.

B.9 — Task Management

Task Assignment	Managers can create tasks and assign them to direct reports: title, description, due date, priority (Low, Medium, High, Critical), and attached files.
Task Tracking	View all tasks assigned to the team with status (Pending, In Progress, Completed, Overdue). Filter by assignee, status, and due date.
Task Completion	When a staff member marks a task complete, the manager receives a notification. Managers can re-open tasks if the completion is insufficient.
Personal Tasks	Managers also have access to their own task list and the same self-service features as staff members for their personal portal view.

PART C

HR ADMIN PORTAL

Full platform control — organisation-wide visibility and configuration

The HR Admin Portal is the operating system for the HR team. It provides full visibility across every staff member, every payroll run, every compliance record, and every platform action. HR Admins are the only users who can configure the platform, run payroll, access audit logs, and manage system users. Every action taken by an HR Admin is logged immutably in the audit trail.

C.1 — HR Overview Dashboard

Organisation Headcount	Total active staff by employment type (Full Staff, Contractors, Onsite). Active vs. inactive count. New hires this month.
Payroll Status	Current payroll run status: Not Started, Draft, Under Review, Approved, Disbursed. Quick-access to the payroll module. Last disbursement amount and date.
Compliance Alerts	Outstanding statutory reminders: income tax filing due, pension remittance due, any failed disbursements requiring retry.
Leave Overview	Staff currently on approved leave. Pending leave requests awaiting action. Absenteeism rate for the current period.
Performance Snapshot	Organisation-wide average performance score. Count of staff below 60 (flagged for PIP consideration). Active PIPs count.
Attendance Summary	Today's attendance: Present, Late, Absent, On Leave counts across the full organisation.
Recent Activity Feed	The five most recent significant actions in the platform: payroll runs, new staff additions, contract signings, grievance submissions, audit-relevant changes.
Quick Actions	One-click shortcuts: Run Payroll, Add Staff, Create Announcement, Generate Report, View Audit Log.
Dashboard Ad Banner	Ad unit for HR tier — restricted to financial services, HR tools, and compliance product categories.

C.2 — Recruitment — ATS & Talent Pool

Job Listings	Create job listings: title, department, salary band, responsibilities, requirements. Mark as internal-only or external. Published listings are visible on the Internal Job Board.
Job Requisitions	Review and approve department manager headcount requests. Each requisition shows: role, justification, proposed salary, target start date, and requester.
Application Tracker	Centralised view of all applications across all open roles. Filter by role, status, date, and source. Each record shows: applicant name, contact, resume, cover letter, role applied for, pipeline stage.
ATS Pipeline	Kanban-style candidate pipeline: Applied → Screening → Interview Scheduled → Interview Complete → Offer → Hired / Rejected. Drag-and-drop stage progression.
Interview Scheduler	Book, reschedule, and log interviews. Capture: date, interviewer(s), format, notes, and post-interview scores. Scheduling conflicts are flagged.

Offers Manager	Generate and track offer letters: salary, start date, role, department, offer expiry. Status: Sent, Accepted, Declined, Expired. Accepted offers trigger automatic staff account creation.
Talent Pool	Strong candidates not hired for the current role. Tag by skill, filter by skill set, add private notes. Candidate records retained indefinitely unless archived by HR.
Talent Pool — Candidate Chat	HR initiates real-time chat with Talent Pool candidates. Candidate receives a secure tokenised link — no account creation needed. Supports: text, file attachments, images.
Talent Pool — Bulk Email	Compose and send personalised emails to individual or bulk-selected candidates. Supports rich-text, templates with variable substitution. Delivery tracking: Sent, Delivered, Opened, Bounced.

C.3 — People & Organisation

Employee Directory	Full searchable, filterable registry of all active and archived staff. HR sees complete profile data. Can filter by department, employment type, status, and role.
Add Staff (Manual)	Create a new staff record: full name, work email, department, employment type, job title, base salary, start date, line manager. System creates a user account and sends a login invitation email.
Staff Profile Management	HR can view and edit all fields in any staff profile: personal bio-data, employment details, salary, tax identification, bank verification number, bank account details, qualifications, documents, and HR-internal notes.
Employment Types	Three classifications with distinct payroll rules: Full Staff (monthly, full benefits), Contractors (monthly, withholding tax applied), Onsite/Labourers (weekly, simplified payroll).
Bio Data Collection	Generate and send tokenised bio-data collection links. Review and approve submitted sections (Employee Details, Guarantor 1, Guarantor 2). Return with correction requests if needed.
Guarantor Management	Review and approve or reject guarantor submissions. Each guarantor section reviewed independently. Approved submissions stored against the staff profile.
Staff Archiving	On exit, staff profiles are set to Inactive with exit date and reason. Records are retained for the minimum statutory period (never hard-deleted). Archived profiles are searchable and accessible to HR.
Org Chart	Auto-generated from reporting lines in staff profiles. View the full hierarchy from CEO/MD downward. Supports search, expand/collapse. Updates in real time when reporting lines change.
Departments	Create, rename, deactivate departments. Each department shows headcount, active staff, and associated roles.
Diversity & Inclusion Dashboard	Workforce composition by gender, age group, department, and employment type. Aggregates only — no PII surfaced.

C.4 — Time, Attendance & Shifts

Organisation-Wide Attendance	Full attendance view for all staff across all departments. Filterable by department, date range, and status. Suspicious log flags (multiple check-ins from different locations) highlighted for review.
Geofencing Configuration	HR can define geofencing zones. Staff check-ins outside the defined radius are automatically flagged. Geofencing can be applied globally or per department.
Timesheet Approval Centre	Consolidated view of all timesheet submissions across the organisation awaiting action. Approve or reject in bulk or individually. Rejection requires a note.
Shift Scheduling	Create and publish shifts for any department or team. Supports rotating, fixed, and day/night patterns. Shifts are visible to staff in their calendars immediately on publication.
HR Calendar	Organisation-wide calendar: attendance, approved leave, shifts, public holidays, and HR events (review cycles, payroll run dates). HR can add organisation-wide events.

Holiday Manager	Configure the annual public holiday calendar. Statutory holidays are pre-loaded per the organisation's country. HR can add, edit, or remove holidays. Holidays are automatically excluded from leave day calculations.
------------------------	--

C.5 — Leave Administration

All Leave Requests	Organisation-wide view of all leave requests across all staff and departments. HR can approve or reject any request, overriding the manager's decision where required.
Leave Balances (All Staff)	Real-time view of every staff member's leave balance across all leave types. Filterable by department and employment type.
Leave Policies	Define and update leave policies per employment type: annual entitlement, accrual method, carry-over rules, blackout periods. Policy changes take effect from the next accrual cycle.
Leave Accrual Configuration	Define accrual rate (e.g. 1.6 days per month for annual leave). System updates balances automatically each month. HR can view the accrual run log.
Absenteeism Report	All unplanned absences (days with no approved leave and no attendance record) across any date range. Excludes weekends and public holidays. Exportable as CSV or PDF.
Global Absence Log	Chronological log of all absence records organisation-wide. Filter by staff member, department, date range, and status.

C.6 — Performance Administration

Organisation Performance Dashboard	Score distribution across the organisation: Elite (80–100), Stable (60–79), Needs Improvement (<60). Department-level breakdown. Count of staff on active PIPs.
Individual Performance Management	HR can view and manage any staff member's performance record: composite score, pillar breakdown, goals, manager reviews, trend chart, PIPs, peer review results, and skills matrix.
Goals & OKRs Administration	Set, edit, and view goals for any staff member. Assign role-appropriate KPI templates. Review actuals at period end. Mass-assign goals to a department or team.
Improvement Plans	Initiate PIPs for any staff member. Monitor milestone progress. Log outcomes (Completed, Extended, Escalated). PIPs are linked to disciplinary records where Grade B or A incidents are present.
360° Peer Reviews — Admin	Create and manage review cycles: select reviewees, assign reviewers, set deadlines. View full results (individual reviewer breakdown) unlike managers and staff who see only aggregated data.
Skills Matrix Administration	Define and update the competency framework per role. View and update skill ratings for any staff member. Export the organisation-wide skills matrix as a report.
Succession Planning	Designate key roles as critical. View all succession nominations across the organisation. Dashboard shows coverage gaps: critical roles with no nominated successor.

C.7 — Learning, Onboarding & Probation

Training Hub	Create training programmes: title, description, format, documents, assigned staff. Track completion rates per programme and per staff member. Compliance training tab for mandatory programmes with deadlines and overdue alerts.
Onboarding Checklists	Create onboarding checklists for new hires: document submission, IT setup, induction sessions, policy acknowledgements. Assign responsible parties and deadlines. Monitor completion status across all active onboarding cohorts.
Probation Tracker	All staff on probation: start date, end date, remaining days, line manager, current review outcome. HR logs confirmation, extension, or termination decisions. Each decision is recorded against the staff profile.

C.8 — Compensation, Payroll & Anchor Disbursement

Payroll Run — Trigger	HR Admin triggers a payroll run for the current period. The system fetches all active staff, their base salaries, approved bonuses, approved commissions, and approved expense reimbursements. The statutory compliance engine computes all deductions per the applicable jurisdiction.
Draft Review	HR sees the full draft payroll: total headcount processed, total gross, total income tax, total pension/provident fund, total housing levy, total withholding tax, total net, and total disbursement amount. HR can drill into any individual payslip, edit values, add notes, or remove specific staff from the run.
Payroll Approval	HR Admin approves the payroll run. If a two-person authorisation rule is configured, a second HR Admin must also approve. Approval is logged with the approver's identity, IP address, and timestamp.
Anchor Disbursement — Automated	On approval, the system instructs Anchor to initiate individual bank transfers for each staff member. Each transfer includes a reference string ('Salary – [Name] – [Month]'). Transfers are executed individually and logged in real time.
Failed Disbursement Handling	Failed transfers are flagged in the HR dashboard within 60 seconds with the failure reason (invalid account number, insufficient funds, Anchor API error). HR can update bank details and retry failed transfers individually or in bulk without reprocessing the full run.
Payroll Runs History	All previous payroll runs grouped by period. Each entry shows: headcount, gross total, deduction breakdown, net total. Drill down to individual payslips per run. Full disbursement log per run.
Disbursement Log	Complete audit trail of every disbursement: staff name, amount, Anchor reference number, timestamp, status (Pending, Processing, Successful, Failed), and failure reason where applicable. Downloadable as CSV or PDF.
Tax Configuration	Configure all applicable statutory rates for each jurisdiction: progressive income tax bands, pension/provident fund (employee and employer rates), housing levy rate, withholding tax rate. Toggle social insurance and health insurance tracking on/off. All changes are logged with effective date.
Compensation Bands	Define salary bands per role and department (minimum and maximum). System flags any staff whose salary falls outside their role's defined band. Used for offer benchmarking and merit increase planning.
Bonuses & Incentives	Log bonuses per staff member: Performance, Annual, Spot Award, Commission. Each entry: staff, type, amount, period, notes. Approved bonuses are included in the next payroll run and disbursed via Anchor automatically.
Benefits Administration	Record the benefits package per employment type and per individual: health insurance plan, provider, vehicle allowance, data allowance. Staff see their own benefits in their portal.
Expenses Management	Review and approve or reject expense claims from staff and managers. Approved claims can be processed alongside the next payroll run or as a standalone Anchor disbursement.
Sales Commission Tracking	Configure commission rates per staff or per role. Track commissionable events (deals closed, payments collected). Review, adjust, and approve commission payouts. Disbursed via Anchor.

C.9 — Engagement, Surveys & Culture

Announcements — Publish	Create and publish company-wide or department-specific announcements: title, body, priority (Normal, Important, Urgent), target audience. Announcements can be pinned. Supports scheduled publishing.
Recognition Wall — Moderation	HR can feature, pin, or remove any recognition post. Full moderation access to the company wall.
Surveys — Create & Analyse	Create eNPS surveys and custom pulse surveys (rating scales, multiple choice, open text). Set anonymity mode. Publish to all staff or targeted departments. View aggregated results: response rate, score breakdowns, open-text responses.
Remote Work Management	Organisation-wide view of remote work patterns. Configure maximum remote days per week per staff or per role. Flag exceptions.

Policy Library — Manage	Upload and publish company policies. Track which staff have read and acknowledged each policy. Send reminders to staff who have not acknowledged mandatory policies.
Internal Job Board — Manage	All internally posted roles. Manage internal applications through the ATS pipeline. Internal candidates are flagged for differentiated treatment.

C.10 — Documents, Contracts & Compliance

Documents Vault	Upload, categorise, and control access to all HR documents. Set visibility per staff member. HR sees all documents organisation-wide.
Contract Kitchen	Full contract lifecycle: create contracts from templates or scratch (Employment Contract, Offer Letter, NDA, Consultancy Agreement, Disciplinary Notice, Exit Settlement). Assign signatories, set visibility, invite legal collaborators. Track status: Draft → Review → Legal Signing → Executed → Voided. Download executed contracts as PDF.
HR Letters — Generate	Generate standard HR letters from built-in templates: Offer Letter, Employment Confirmation, Salary Review, Promotion, Warning, Termination. Auto-populated with staff details, editable before issuing.
Work Permits	Track work permit and visa status for non-citizen employees: permit type, issuing authority, issue and expiry dates, document upload. Alerts generated as expiry approaches.
HR Requests — Manage	Manage all staff-submitted HR requests. Assign to an HR team member, update status, and resolve. Search and filter by request type, status, and assignee.
Grievances — Manage	Full grievance management: view all submissions (anonymous and named), update status (Open → In Review → Resolved → Closed), add internal notes. Anonymous submissions have no submitter linkage at the database level.
Disciplinary Records	Log and manage incidents across four severity levels (D–A). View full disciplinary history per staff member and organisation-wide. Repeated incidents trigger automatic HR alerts. Grade A incidents require HR-level sign-off to close.
Asset Manager	Register and track all company assets: name, type, serial number, purchase date, value, current status, and assigned staff. Log assignment and recovery with timestamps. During offboarding, asset recovery checklist is auto-populated from assigned assets.

C.11 — Administration, Reports & Audit

HR Reports	Pre-built report library: Headcount by department and type, Payroll summary, Leave utilisation, Attendance rate, Performance score distribution, Disciplinary incidents, Recruitment funnel metrics, Bonus and commission totals, Attrition report. All filterable by date range. Downloadable as CSV or PDF.
Exit & Offboarding Manager	Initiate offboarding for a departing staff member: set exit date and reason, review and confirm asset recovery, deactivate the profile, trigger final payroll run if applicable. Archived profiles remain accessible for the minimum statutory retention period.
Exit Interviews	Conduct and log structured exit interviews after offboarding is initiated. Questions: reason for leaving, overall experience, improvement suggestions, likelihood to return, willingness to recommend. Responses aggregated into exit analytics.
System Users	Create new user accounts, assign roles (HR Admin, Manager, Staff), deactivate accounts, reset passwords. All role changes logged in the audit trail.
Audit Logs	Every action in the platform is logged: actor identity, module, action type (Create, Update, Delete, Approve, Reject), affected record, before/after values, IP address, timestamp. Read-only — cannot be modified or deleted.
Settings & Configuration	Company name and branding, org structure defaults, payroll frequency and schedule, Anchor disbursement settings and funding account, statutory tax configuration, leave policy defaults, notification preferences (in-app, email), theme (Light, Dark, Warm).
Task Manager (HR)	HR Admins have their own task management view. Can create tasks and assign to any staff member, manager, or HR team member. Full task tracking across the organisation.

5 · Payroll Disbursement — Detailed Flow

The automated payroll disbursement flow via Anchor is the defining operational workflow of Everywin. It is fully automated once configured. Human checkpoints exist to prevent errors, not to slow the process. All steps are logged immutably.

Step 1 · Configuration (One-time)	HR connects the company's Anchor account and funding account. Bank account details for each staff member are entered and verified via Anchor's account name lookup API. Payroll schedules are set per employment type (monthly for full staff and contractors; weekly for onsite/labourers). Disbursement approval rule configured: auto-disburse on approval, or require second HR authorisation.
Step 2 · Payroll Preparation	On the configured schedule (or when HR triggers manually), the system generates a draft payroll run: fetches all active staff and their base salaries, applies approved bonuses, commissions, and expense reimbursements for the period. The statutory compliance engine computes income tax, pension/provident fund, housing levy, withholding tax, and net pay per staff member per the applicable jurisdiction. A draft payslip is generated for each.
Step 3 · HR Review	HR sees the full payroll run: total headcount, total gross, deduction breakdown by type, total net, total disbursement amount. HR can drill into any individual payslip, edit values, add notes, add or remove specific staff. Editing is logged with the editor's identity.
Step 4 · Approval	HR Admin approves the payroll run. If a two-person authorisation rule is configured, a second HR Admin must approve before disbursement proceeds. All approvals are logged with identity, IP address, and timestamp.
Step 5 · Anchor Disbursement (Automated)	On approval, the system instructs Anchor to initiate individual bank transfers for each staff member's net pay from the company's Anchor funding account. Each transfer includes a reference string: 'Salary – [Name] – [Month/Week]'. All Anchor API calls are idempotent — duplicate transfer attempts are blocked automatically.
Step 6 · Staff Notification	Each staff member receives an in-app notification (and optional email): 'Your salary of ■[amount] for [period] has been disbursed to your [Bank] account ending [last 4 digits].' Notification is triggered only on confirmed Successful status from Anchor.
Step 7 · Failed Disbursement Handling	Any failed transfer is flagged in the HR dashboard within 60 seconds with the failure reason. HR can update the bank details if incorrect and retry failed transfers individually or in bulk, without reprocessing the full payroll run. No silent failures — all errors surface.
Step 8 · Reconciliation	The disbursement log shows the Anchor reference number for every successful transfer. HR downloads the log as CSV or PDF for reconciliation against the company's bank statement. Log entries are immutable.

6 · Universal Messaging System

The Universal Messaging System is a full-featured, real-time communication layer embedded across all three portals. It eliminates the need for external messaging tools (WhatsApp, Telegram) for internal communication, keeping all workplace conversations within the platform where they are subject to HR oversight and data retention policies.

Direct Messages	Any user can start a one-on-one conversation with any other user. Real-time delivery. Persistent across sessions.
Supported Content Types	Plain text, images (JPG, PNG, GIF including animated), videos (MP4, configurable size limit), documents (PDF, DOCX, XLSX, common formats), voice notes (recorded in-browser/app), emoji reactions on any message.
Group Chats	Any user can create a group and add multiple members. Group features: name, optional avatar, add/remove members, group description, pin important messages, mute notifications per group.
Group Visibility by Role	HR Admin: all groups organisation-wide. Manager: all groups containing any direct report. Staff: only groups they are a member of.
Message Search	HR Admin: search all conversations org-wide. Manager: search within team conversations. Staff: search own threads only. Search by keyword, sender, or date range.
Message Status	Sent, Delivered, Read indicators on every message.
Notifications	In-platform notification badge. Optional email digest for offline messages. Notification preferences configurable per user.
Moderation	HR Admins can view any thread for compliance. HR can delete any message or attachment. Moderation log records deletions with actor identity, message reference, and timestamp.
Privacy Disclosure	Platform policy (visible in Policy Library) discloses that internal communications are subject to HR oversight. Users are not notified in real time when HR reviews their messages.

7 · Statutory Compliance Engine

The compliance engine computes all statutory employer and employee obligations automatically on every payroll run, per the jurisdiction configured for the organisation. Everywin ships with pre-built compliance packs for supported countries. New jurisdictions can be added via the tax configuration module. All computation changes are logged with an effective date — the system always applies the configuration that was active at the payroll run date.

Standard Obligation Categories

The table below maps the universal obligation categories that Everywin models. The labels and rates shown reflect a reference implementation (e.g. Nigeria). Each organisation's HR Admin configures the applicable rates and authority names for their own jurisdiction via Settings.

Obligation	Authority	Rate / Basis	How Everywin Handles It
Income Tax (PAYE / WHT equivalent)	National / State Revenue Authority	Progressive bands or flat rate per jurisdiction	Auto-computed with any applicable statutory relief allowance applied. Annual taxable income and monthly deduction shown on each payslip.
Pension / Provident Fund	Pension Regulator (per country)	Employee % + Employer % (configurable)	Mandatory for applicable employment types. Configurable rates per organisation. Tracked per designated fund administrator.
Housing / Infrastructure Levy	National Housing Authority (per country)	% of basic salary (configurable)	Applied to eligible staff based on configuration. Shown as a named deduction on payslip. Toggle on/off per org.
Withholding Tax	Revenue Authority (per country)	% on contractor payments (configurable)	Auto-applied to contractors. Not applied to full staff by default. Rate configurable per organisation.
Health Insurance / HMO	National Health Authority (per country)	Per employee per benefits config	Tracked per benefits configuration. Toggle on/off per org. Shown in benefits administration.
Social / Workplace Insurance	Social Insurance Fund (per country)	Workplace insurance contribution	Included in compliance dashboard. Toggle on/off. Contribution logged per payroll run.

Income Tax Bands — Reference Implementation (configurable per org)

The bands below illustrate the progressive PAYE structure for a reference jurisdiction. All bands, rates, and relief allowances are fully configurable per organisation in the Tax Configuration module under C.8. The engine applies whichever rates are active at the time of each payroll run.

Annual Income Band	Tax Rate
First threshold (e.g. first ₦300,000 or equivalent)	Lowest rate (e.g. 7%)
Second band	~11%
Third band	~15%
Fourth band	~19%

Fifth band	~21%
Above top threshold	Top rate (e.g. 24%)

A statutory Relief Allowance (equivalent to Consolidated Relief Allowance, or the local equivalent) is applied before computing taxable income. The engine displays the annual taxable income used, the relief applied, and the monthly income tax deducted on every payslip — giving staff and HR full transparency into the tax computation.

Country Compliance Packs

Everywin ships with pre-configured compliance packs for supported markets. Each pack includes statutory income tax bands, pension/provident fund rates, applicable levies, and public holiday calendars. HR Admins select their country during onboarding and can customise rates within legal bounds. Additional country packs are added as Everywin expands into new markets.

8 · Non-Functional Requirements

Performance	Dashboard pages load within 3 seconds. Performance scores refresh daily. Payroll draft generation completes within 30 seconds for up to 500 staff.
Security	Access enforced at API and database level — never UI-only. No staff member can access another staff member's data. No cross-tenant data access. All monetary data stored as fixed-precision decimal (never floating point).
Data Integrity	All monetary values stored as Numeric(15,2). Soft deletes only — no hard deletions of staff, payroll, or compliance records. Foreign key integrity enforced at database level.
Auditability	Every change to staff profiles, goals, review scores, payroll, contracts, and system settings is logged with actor identity, timestamp, and before/after values. Audit logs are immutable.
Scalability	Must support up to 1,000 staff records per tenant across multiple departments and employment types without architectural changes.
Data Retention	Exited staff profiles and payroll records retained for the minimum statutory period per jurisdiction (minimum 5 years as a platform baseline). Audit logs retained indefinitely. Anonymous grievance submissions — submitter identity cryptographically severed on save.
Availability	Core payroll and disbursement workflows must maintain 99.9% uptime. Payroll runs must not be affected by UI downtime. Anchor disbursement runs as a background process isolated from UI service health.
Anchor Integration	All Anchor API calls must be idempotent. Failed transfers must never silently fail — all errors surface in the HR dashboard within 60 seconds. Retry logic with exponential backoff on transient failures.
Confidentiality	Anonymous grievances are cryptographically anonymised — no server-side linkage to the submitter. HR cannot re-identify anonymous submissions through any platform interface or admin tool.
Multi-Tenancy	All tenant data partitioned at database level using organisation_id. Row-level security enforced by the database engine. No shared mutable state between tenants.

9 · Glossary

Anchor	Nigerian banking infrastructure platform used for programmatic bank transfers and automated payroll disbursement.
Income Tax (PAYE / WHT)	Pay As You Earn or equivalent — progressive or flat-rate personal income tax withheld by employers and remitted to the relevant national or regional revenue authority.
Revenue Authority	The national or state body responsible for collecting income tax and other statutory remittances (e.g. FIRS in Nigeria, KRA in Kenya, SARS in South Africa).
Pension / Provident Fund	Mandatory employer and employee contributions to a licensed pension or provident fund administrator, as required by the applicable jurisdiction's pension legislation.
Housing / Infrastructure Levy	A statutory contribution to a national housing or infrastructure fund, deducted from employee basic salary (e.g. NHF in Nigeria). Configurable per jurisdiction.
Withholding Tax (WHT)	Tax deducted at source from contractor and professional service payments and remitted to the revenue authority.
Relief Allowance (CRA equivalent)	A statutory deduction applied to gross income before computing taxable income. The label and formula vary by jurisdiction (e.g. Consolidated Relief Allowance in Nigeria).
Fund Administrator (PFA equivalent)	The licenced pension or provident fund custodian to which contributions are remitted. Varies by jurisdiction.
Compliance Pack	A pre-configured set of statutory tax bands, pension rates, applicable levies, and public holiday calendars for a specific country, loaded during org onboarding.
PIP	Performance Improvement Plan — a formal structured plan to support and monitor an underperforming staff member.
eNPS	Employee Net Promoter Score — a single-question survey measuring likelihood to recommend the company as an employer.
ATS	Applicant Tracking System — the software pipeline managing candidates through the recruitment process.
OKR	Objectives and Key Results — a goal-setting framework linking individual targets to organisational outcomes.
RBAC	Role-Based Access Control — an access model where permissions are granted based on assigned role.
Bank / Identity Verification Number	A unique biometric or identity identifier linked to a bank customer, used to verify account ownership before payroll disbursement (e.g. BVN in Nigeria).
Tax Identification Number (TIN)	A unique identifier assigned to a taxpayer by the relevant revenue authority.
Multi-Tenant	A software architecture where a single platform instance serves multiple organisations, each with fully isolated data.
Everywin OS	The organisation-specific operating environment each registered company accesses within Everywin.
Universal Messaging System	Everywin's built-in real-time communication layer: DMs, group chats, full media support, role-based access.

Soft Delete	A data approach where records are marked inactive but retained in the database — never permanently removed.
Idempotent	A property of an API call where making the same request multiple times produces the same result — preventing duplicate bank transfers.
CPM	Cost Per Mille — advertising pricing where the advertiser pays per 1,000 impressions.
CPC	Cost Per Click — advertising pricing where the advertiser pays each time a user clicks the ad.
Ads Wallet	A pre-funded balance within an advertiser's Everywin Ads Account used to pay for campaign spend in real time.
