CHAPTER 1

Getting Started & Portal Overview

Login, dashboard orientation, and portal architecture

The HRM Portal is your organisation's single platform for every HR function — from hiring and onboarding to payroll and performance management. This guide walks through every module so you can operate the portal confidently from day one.

1.1 Logging In

Open the portal URL in your browser. Enter your registered email and password.

- Step 1.** Navigate to your organisation's portal URL.
- Step 2.** Enter your email address and password.
- Step 3.** Click **Sign In**. If this is your first login, use the temporary password from your invite email and change it immediately.
- Step 4.** If you have forgotten your password, click **Forgot Password** on the login screen.

■ First-time users must change their temporary password before accessing the portal.

1.2 Portal Architecture

The diagram below illustrates how the three user roles connect to portal modules, which in turn read from and write to the underlying data and integration layer.

Figure 1.1 — HRM Portal system overview

1.3 Dashboard at a Glance

After login you land on the **HR Overview** dashboard. The dashboard shows KPI summary cards (total headcount, average performance score, pending leave requests), quick-link buttons to Goals, Staff, and Reports, and a notification bell in the top-right for pending actions.

- **KPI cards** — click any card to drill into the underlying report.
- **Quick links** — jump directly to Goals & OKRs or the Staff directory.
- **Notification bell** — shows pending leave approvals, tasks, and system alerts.
- **Theme toggle** — switch between dark and light mode (top-right corner).

1.4 User Roles Summary

Three primary roles govern what each user can see and do:

Role	Access Level	Key Capabilities
HR Admin	Full Access	All modules, system settings, user management, reports
Manager	Departmental	View own team, approve leave/timesheets, update KPI actuals, review performance
Staff	Personal	Own profile, leave requests, payslips, bio data, goals view

CHAPTER 2

Portal Navigation & Sidebar Guide

A complete map of every sidebar item visible to HR Admins

The sidebar is your primary navigation tool. HR Admins see the full sidebar; Managers and Staff see a condensed version. The diagram below groups all sidebar items by section.

Figure 2.1 — Sidebar section map (HR Admin view)

Section: Overview

HR Overview	Main dashboard: KPI cards, quick links, and headcount summary.
Task Manager	Create and assign HR tasks; mark complete; filter by assignee.

Section: Recruitment

Jobs	Post job adverts, set hiring manager, publish/close roles.
Job Requisitions	Approve or reject headcount requisition requests.
Applications	Review incoming applications; shortlist or reject candidates.
ATS Pipeline	Visual kanban board — click a card to move candidates between stages.
Interviews	Schedule interviews; send calendar invites; reschedule.
Offers	Create and send offer letters; mark offers as accepted.
Talent Pool	Store promising candidates for future openings.

Section: People & Org

Employees	Full staff directory: invite, edit, deactivate, export CSV.
Bio Data Collection	Request and download employee bio data forms.
Guarantor Forms	Manage guarantor submissions and verification.
Org Chart	Visual reporting-line chart; export for presentations.
Departments	Add and manage departments; assign department heads.
Diversity & Inclusion	Run D&I; surveys and view summary metrics.

Section: Time & Attendance

Attendance	View clock-in/out records; adjust entries; approve missing punches.
Timesheets	Submit and approve weekly/monthly timesheets.
Timesheet Approvals	Bulk approve or reject pending timesheet submissions.
Shift Scheduling	Create shifts and publish rosters; manage shift swaps.
Calendar	HR-wide event calendar; create and track HR events.
Holidays	Define public holidays and company blackout dates.

Section: Leave

Leave Requests	Review pending requests; approve, reject, or bulk-approve.
Leave Balances	View and manually adjust individual leave balances.
Leave Policies	Create accrual policies and assign to employee groups.
Leave Accrual	Configure and trigger automated balance accrual runs.

Section: Performance

Performance	High-level performance dashboards; filter by team or period.
Goals & OKRs	Create, assign, and track goals; trigger KPI sync.
Improvement Plans	Create and assign performance improvement plans (PIPs).
360° Peer Reviews	Manage multi-rater peer review cycles.
Skills Matrix	View competency gaps; assign training.
Succession Planning	Nominate successors and track readiness.

Section: Learning & Growth

Training	Create training sessions; enroll staff; track completion.
Onboarding	Build and assign onboarding checklists for new hires.
Probation Tracking	Start, monitor, and complete probation periods.

Section: Compensation & Benefits

Payroll	Run payroll; approve; export payslips.
Compensation Bands	Define and edit salary bands.
Bonuses & Incentives	Create bonus cycles; disburse to eligible staff.
Benefits	Add and assign employee benefits packages.
Expenses	Approve or reject expense claims.
Tax Configuration	Edit tax rules and apply to payroll runs.

Section: Engagement & Culture

Announcements	Post, pin, and archive company-wide announcements.
Recognition	Give and view peer recognition kudos.
Surveys	Create, send, and analyse staff engagement surveys.
Remote Work	Manage WFH requests and policies.
Policy Library	Upload, share, and acknowledge HR policy documents.
Internal Job Board	Post internal vacancies; allow self-application.

Section: Documents & Compliance

Documents	Central document vault: upload, download, set permissions.
■■ Contract Kitchen	Draft and manage employment contracts; send for e-signature.
HR Letters	Generate appointment, offer, and warning letters.
Work Permits	Track permit documents and expiry dates.
Requests	Manage general HR service requests from staff.
Grievances	Open and track formal grievance cases.
Disciplinary Records	Log disciplinary incidents and attach evidence.
Assets	Assign and track company asset returns.

Section: Administration

Reports	Run scheduled or on-demand HR reports; export as PDF or Excel.
Exit & Offboarding	Initiate and track the offboarding checklist.
Exit Interviews	Schedule and record exit interview notes.
Users	Manage system user accounts; change roles; deactivate.
Audit Logs	View full system activity log; filter and export.
Settings	Configure system-wide HR settings.
My Profile	Update personal info, change password, upload avatar.

CHAPTER 3

User Management & Roles

Invite users, assign roles, and manage permissions

3.1 Inviting a New User

Step 1. Navigate to **People & Org** → **Employees** to add new staff.

Step 2. Click **Add New Staff Member** (or `Invite`) → fill Full Name, Email, Department, Roles → set a default password and confirm.

Step 3. Click **Create Staff Account** to create the account (HR sets the initial password).

Step 4. The user must change their password on first login.

3.2 Editing a User Profile

Step 1. Go to **People & Org** → **Employees**.

Step 2. Search for the staff member and click their name.

Step 3. Click **Edit Profile** to update: job title, department, line manager, phone number, and employment type.

Step 4. Click **Save**.

3.3 Deactivating a User

Deactivation prevents portal access without deleting records. Only deactivate accounts for leavers — not for role changes or temporary leave.

Step 1. Open the staff profile via **Employees**.

Step 2. Click **Edit Profile**.

Step 3. Click **Deactivate Account** and confirm.

Step 4. The account is locked immediately. Historical records are preserved.

3.4 Permission Matrix

The table below summarises key actions by role:

Action	HR Admin	Manager	Staff
Create KPI Templates	✓	—	—
Create & Assign Goals	✓	—	—
Update Manual KPI Actuals	✓	✓	—
Trigger Sync Performance	✓	—	—
Approve Leave Requests	✓	✓	—
Invite / Deactivate Users	✓	—	—

Action	HR Admin	Manager	Staff
Run Payroll	✓	—	—
View Own Payslip	✓	✓	✓
Submit Leave Request	✓	✓	✓
View Own Goals	✓	✓	✓
Edit Own Profile	✓	✓	✓
Run HR Reports	✓	✓	—
Access Audit Logs	✓	—	—

CHAPTER 4

Recruitment & ATS Pipeline

Post jobs, track applicants, schedule interviews, and issue offers

4.1 Recruitment Funnel

Typical funnel: numbers represent relative candidate count at each stage

Figure 4.1 — Typical ATS candidate funnel

4.2 Posting a Job

Step 1. Go to **Recruitment** → **Jobs** → **New Job**.

Step 2. Enter: Job Title, Department, Hiring Manager, Location, and Job Description.

Step 3. Attach any required documents (e.g., job spec PDF).

Step 4. Click **Publish** to make the role live. It will appear on the Internal Job Board and any integrated external channel.

Step 5. Use **Close Job** once hiring is complete.

4.3 Managing Applications

Step 1. Open **Recruitment** → **Applications**.

Step 2. Filter by job, keyword, or stage.

Step 3. Click a candidate to open their profile.

Step 4. Choose **Shortlist** to advance the candidate or **Reject** to close their application (an automated email is sent).

Step 5. To schedule an interview: click **Schedule Interview**, pick an interviewer and time slot, then click **Send Invite**.

4.4 ATS Pipeline (Kanban Board)

The ATS Pipeline provides a visual kanban board where each column represents a hiring stage. HR and hiring managers can drag candidate cards between stages in real time.

- Stages: **Applied** → **Screened** → **Interview** → **Offer** → **Hired**
- Click a card to **Add Note** or **Email Candidate**.
- Stage changes are logged in the candidate's activity timeline.

4.5 Making an Offer

Step 1. Go to **Recruitment** → **Offers** → **Create Offer**.

Step 2. Select the candidate and position.

Step 3. Fill in the offer details (salary, start date, probation period).

Step 4. Click **Send Offer**. The candidate receives the offer letter for review.

Step 5. Once the candidate accepts, click **Mark Accepted** — the system triggers the onboarding workflow.

CHAPTER 5

People & Organisation

Staff directory, org chart, departments, and bio data

5.1 Employees Module

The Employees module is the central staff registry. Every person in the organisation has a profile here, regardless of their system role.

- **Invite** — adds a new user account and sends a welcome email.
- **Edit Profile** — update title, department, manager, contact details.
- **Deactivate** — locks portal access for leavers without deleting records.
- **Export CSV** — downloads the full staff list for reporting or external HR systems.

5.2 Org Chart

The Org Chart page renders a live visual of the organisation's reporting hierarchy. Use it to verify that all line-manager relationships are correctly set before running performance reviews or payroll. Click **Export** to download a PNG for presentations.

■ *If a staff member appears without a manager, edit their profile and set the Line Manager field.*

5.3 Departments

Step 1. Go to **People & Org** → **Departments** → **Add Department**.

Step 2. Enter department name, department head, and a brief description.

Step 3. Click **Save**. The new department is now available in all dropdowns (goals, leave policies, reports).

5.4 Bio Data Collection

HR can request employees to fill in a structured bio data form covering personal details, qualifications, next of kin, and bank information. The form link is sent via email.

- Go to **Bio Data Collection** → **Request Form** and select the staff member(s).
- The employee receives a secure, tokenised link to complete the form.
- Submitted forms appear in **Bio Data Collection** for HR review and download.

5.5 Guarantor Forms

For roles requiring a guarantor, HR uses **Guarantor Forms** to request, verify, and store completed guarantor submissions. Click **Request Guarantor**, select the staff member, and the guarantor receives a secure form link. Once submitted, HR clicks **Verify** to confirm the guarantor's details.

CHAPTER 6

Time & Attendance

Clock-in records, timesheets, shift scheduling, and holidays

6.1 Attendance Records

The Attendance page shows every clock-in and clock-out event. Events are captured automatically when staff use the mobile or web attendance widget.

- **Adjust Entry** — correct a wrong clock time (e.g., forgotten clock-out).
- **Approve Missing Punches** — authorise records with no clock-out.
- **Export** — download attendance data for payroll verification.

6.2 Timesheets

Staff submit timesheets weekly or monthly (depending on policy). Managers and HR review submissions before approving.

Step 1. Open **Time & Attendance** → **Timesheets**.

Step 2. Filter by period and employee.

Step 3. Open a timesheet to review hours by day.

Step 4. Click **Approve** to confirm, or **Request Changes** to send back with a comment.

Step 5. Approved timesheets feed into payroll calculation.

■ *Bulk approve: use Timesheet Approvals under the same section to process multiple at once.*

6.3 Shift Scheduling

Step 1. Go to **Shift Scheduling** → **Create Shift**.

Step 2. Set owner (employee or team), start time, end time, and repeat rules (daily/weekly).

Step 3. Click **Publish Schedule** to notify affected staff.

Step 4. Staff can request a **Swap Shift**; the request is routed to the manager for approval.

6.4 Holidays Manager

Define public holidays and company blackout dates here. These dates are automatically excluded from leave balance calculations and shift schedules.

- Go to **Holidays** → **Add Holiday** and enter the name, date, and whether it is a recurring annual holiday.

CHAPTER 7

Leave Management

Policies, requests, approvals, balances, and accrual

7.1 Leave Approval Workflow

Figure 7.1 — Leave request approval workflow

7.2 Approving a Leave Request

Step 1. Open **Leave** → **Leave Requests**.

Step 2. Filter by status: **Pending**.

Step 3. Click a request to view details, attachments, and the employee's remaining balance.

Step 4. Click **Approve** or **Reject**. Add an optional comment for the employee.

Step 5. The employee is notified immediately by email and their balance is updated.

■ Use Bulk Approve to process multiple pending requests simultaneously — use cautiously.

7.3 Managing Leave Balances

- Go to **Leave** → **Leave Balances** and search for the employee.
- Click **Adjust Balance** to manually correct accrual errors.
- Always add a note explaining the adjustment for audit purposes.

7.4 Leave Policies

Leave policies define how many days each leave type accrues per period and who is eligible.

Step 1. Go to **Leave** → **Leave Policies** → **Create Policy**.

Step 2. Name the policy (e.g., 'Annual Leave — Full Time'), set leave type, accrual rate, carry-over rules, and maximum balance.

Step 3. Click **Assign** to link the policy to one or more employee groups.

Step 4. Edit existing policies using the **Edit** button; changes take effect from the next accrual run.

7.5 Leave Accrual

The **Leave Accrual** page lets HR configure and trigger accrual runs. Accrual can be set to run automatically on a schedule or triggered manually.

- Click **Edit Accrual** to change the accrual schedule.
- Click **Run Accrual** to immediately process balances for all eligible staff.

CHAPTER 8

Performance & KPI Management

Goals & OKRs, KPI Library, automated grading, and sync engine

8.1 Overview

The Performance module supports goal-setting, KPI tracking, peer reviews, improvement plans, and succession planning. The most-used section is **Goals & OKRs**, where HR creates goals, assigns them to individuals or departments, and monitors achievement automatically or manually.

8.2 KPI Library — Creating Templates

The KPI Library holds reusable measurement templates. Before creating a goal, at least one KPI template must exist.

Step 1. Go to **Performance** → **Goals & OKRs**. Click the **KPI Library** tab (or navigate directly).

Step 2. Click **+ Define New KPI**.

Step 3. Enter: **KPI Name** (e.g., 'Monthly Sales Revenue'), **Target Department**, **Measurement Source** (see table below), **Default Unit** (e.g., NGN, deals, %), and a **Description**.

Step 4. Toggle **Active** to ON.

Step 5. Click **Save**.

8.3 Measurement Sources Reference

Measurement Source	What It Counts	Linked Data
sales_revenue	Total invoiced sales by rep	Invoices table (sales_rep_id)
sales_deals_closed	Closed deals in period	Deals / opportunities
sales_collection_rate	% invoices collected	Payments vs invoices
mkt_leads_added	New marketing contacts	marketing_contacts (created_by)
mkt_lead_conversion	Leads converted to clients	Contact status transitions
ops_appointments	Appointments completed	appointments table
admin_ticket_esc	Support tickets escalated	support_tickets (resolved_at)
manual	Manager enters actual manually	No automation — HR/manager input required

8.4 Creating and Assigning a Goal

Step 1. Open **Goals & OKRs** → **Create & Activate Goal**.

Step 2. Choose assignment type: **Staff Member** or **Department**.

Step 3. Select a KPI template from the library (recommended) or type a custom KPI name.

Step 4. Set **Monthly Target**, **Unit**, and **Performance Period** (select the month).

Step 5. Set **Publication Status** to **Published** so the staff member can see their goal.

Step 6. Click **Create & Activate Goal**. The goal appears in the list with a progress bar.

■ If you select an automated template, the system calculates actual values during the next sync.

8.5 Automated KPI Grading Flow

Figure 8.1 — KPI grading decision flow (automated vs manual)

8.6 Triggering the Sync

Automated KPIs are refreshed nightly by a backend scheduler. To request an immediate refresh during testing or after a data change:

Step 1. Open **Performance** → **Goals & OKRs**.

Step 2. Click the ■ **Sync Performance** button (top-right of the Goals list).

Step 3. Wait 2–10 seconds, then refresh the page.

Step 4. Verify that **achievement_pct** has updated and **last_synced_at** shows the current time.

Step 5. Check **achievement_status**: Achieved / On Track / At Risk / Behind.

8.7 Updating Manual KPIs

For goals using the **manual** measurement source, the manager or HR must enter the actual value themselves.

Step 1. Open the goal from the Goals & OKRs list.

Step 2. Click **Update Progress** (or **Edit**).

Step 3. Enter the actual value in the **Actual** field.

Step 4. Click **Save**. The system recalculates achievement_pct immediately.

8.8 Sales Rep Linking (Required for Revenue KPIs)

Sales KPIs (sales_revenue, sales_deals_closed, sales_collection_rate) resolve amounts by looking up the staff member's **sales_rep_id** in the database. If this link is missing, all sales KPIs will report 0.

- Open the **Sales Reps** admin section (Administration or the Sales module).
- For each sales rep record, select the matching HR staff account from the dropdown and click **Save**.
- This is a one-time setup per rep. After linking, the next sync will populate correct values.

8.9 360° Peer Reviews

Step 1. Go to **Performance** → **360° Peer Reviews** → **Create Review**.

Step 2. Select the reviewee and the review period.

Step 3. Click **Invite Reviewers** and add peers, direct reports, and the line manager.

Step 4. Reviewers receive email invitations to complete the questionnaire.

Step 5. Once all reviews are submitted, click **Publish Results** to share with the reviewee.

CHAPTER 9

Payroll, Compensation & Benefits

Run payroll, issue payslips, configure bonuses, benefits, and tax

9.1 Running Payroll

- Step 1.** Go to **Compensation & Benefits** → **Payroll**.
- Step 2.** Click **Run Payroll**.
- Step 3.** Verify the pay period and review the total payroll summary.
- Step 4.** Click **Approve & Run** to finalise.
- Step 5.** Use **Export Payslips** to download payslip PDFs for distribution.

■ *Payroll pulls in approved timesheets, bonuses, and tax rules automatically. Verify all inputs before running.*

9.2 Payslip Breakdown

Each payslip shows: basic salary, allowances, bonuses/commissions, tax deductions, pension contributions, and net pay. Staff can view their own payslips under **My Payslip**.

9.3 Compensation Bands

Compensation Bands define salary ranges for each grade or role. HR uses these to ensure new hires and promotions fall within approved ranges.

- Go to **Compensation Bands** → **Edit Band** to update min/max salaries.
- Click **Export** to generate a compensation band report for senior management.

9.4 Bonuses & Incentives

- Step 1.** Go to **Bonuses & Incentives** → **Create Bonus**.
- Step 2.** Select the bonus type (performance, referral, discretionary), eligible staff, and amounts.
- Step 3.** Click **Disburse**. The bonus is added to the next payroll run.

9.5 Benefits Management

Add benefit packages (health insurance, pension, meal vouchers) and assign them to individual staff or entire departments via **Benefits** → **Add Benefit** → **Assign to Staff**.

9.6 Tax Configuration

Tax rules are managed under **Tax Configuration**. After editing tax bands or rates, click **Apply to Payroll** to ensure the next payroll run uses the updated rules.

CHAPTER 10

Engagement, Culture & Communications

Announcements, recognition, surveys, remote work, and policy library

10.1 Announcements

Step 1. Go to **Engagement & Culture** → **Announcements** → **New Announcement**.

Step 2. Enter a title, body text, and select the target audience (all staff, a department, or specific roles).

Step 3. Click **Publish**. The announcement appears on all targeted staff dashboards immediately.

Step 4. Use **Pin** to keep important notices at the top of the feed; use **Archive** to remove outdated ones.

10.2 Recognition Wall

The Recognition Wall is a company-wide kudos feed. HR and managers can highlight exceptional contributions publicly.

- Click **Give Recognition**, select the staff member, choose a badge category, and write a note.
- Recognitions appear in the feed visible to all staff, boosting engagement.

10.3 Surveys

Step 1. Go to **Surveys** → **Create Survey**.

Step 2. Add questions (multiple choice, rating scale, or open text).

Step 3. Choose recipients (all staff, a department, or specific individuals).

Step 4. Click **Send**. Staff receive a survey link via email or in-app notification.

Step 5. View **Results** once responses are collected — charts are generated automatically.

10.4 Remote Work Requests

Staff submit WFH requests via **Remote Work** → **Request WFH**. HR or managers approve via the same module. HR can toggle to the HR view to see all requests across the organisation.

10.5 Policy Library

Upload HR policy documents (employee handbook, code of conduct, data policy) to the Policy Library. Staff must **Acknowledge** reading key documents — acknowledgement records are stored for compliance.

CHAPTER 11

Documents, Contracts & Compliance

Document vault, Contract Kitchen, HR letters, grievances, and disciplinary

11.1 Documents Vault

The Documents Vault is a central repository for all HR-related files. Access is controlled by permissions set per document.

- **Upload** — add a new document and set access permissions (HR only, manager, all staff).
- **Download** — retrieve any document you have permission to view.
- **Set Permissions** — restrict or widen access at any time.

11.2 Contract Kitchen

Contract Kitchen is the portal's contract management system. It supports creation, digital signing, and archiving of employment contracts.

Step 1. Go to **Documents & Compliance** → **Contract Kitchen** → **New Contract**.

Step 2. Select a template (e.g., Full-Time Employment Agreement) and populate staff-specific details.

Step 3. Click **Send for Signature**. The staff member receives a secure signing link.

Step 4. Once signed, the contract status updates to **Executed** and is stored in the vault.

Step 5. Use **Archive** for terminated or superseded contracts.

11.3 HR Letters

Generate standard letters (appointment letters, promotion letters, query letters, warning notices) from pre-built templates.

- Go to **HR Letters** → **Create Letter**, choose a template, and fill in variables.
- Click **Send** to email the letter or download as a PDF.

11.4 Grievances & Disciplinary Records

- **Grievances:** Open a case from **Grievances** → **Open Case**, log details, update status as the case progresses.
- **Disciplinary:** Record an incident via **Disciplinary Records** → **New Incident**, attach evidence (e.g., written warning), and track outcomes.
- All records are time-stamped and audit-logged.

11.5 Work Permits & Assets

- **Work Permits:** Upload permit documents; the system flags approaching expiry dates.
- **Assets:** Assign company assets (laptop, phone) to staff; track return on offboarding.

CHAPTER 12

Onboarding, Probation & Offboarding

New hire checklists, probation tracking, and exit management

12.1 Onboarding Flow

Figure 12.1 — New hire onboarding journey

12.2 Creating an Onboarding Checklist

Step 1. Go to **Learning & Growth** → **Onboarding** → **Create Checklist**.

Step 2. Add tasks: e.g., Sign Employment Contract, Complete ID Verification, IT Equipment Issued, Company Email Created, Meet Line Manager, Complete Probation Agreement.

Step 3. Assign the checklist to the new hire.

Step 4. Track completion from the Onboarding dashboard — incomplete tasks show as pending.

12.3 Probation Tracking

Step 1. Go to **Learning & Growth** → **Probation Tracking** → **Start Probation**.

Step 2. Select the employee and set the probation duration (typically 3–6 months).

Step 3. The system tracks days elapsed and sends reminders as the end date approaches.

Step 4. On completion, click **Complete** to confirm passing, or **Flag** to extend or escalate.

12.4 Exit & Offboarding

Step 1. Go to **Administration** → **Exit & Offboarding** → **Start Offboarding**.

Step 2. Select the leaving staff member and their last working day.

Step 3. The system generates an offboarding checklist: asset return, access revocation, payroll finalisation, exit survey.

Step 4. Schedule and record an **Exit Interview** via **Exit Interviews** → **Schedule**.

Step 5. Deactivate the user account after the last working day.

CHAPTER 13

Reports & Audit Logs

Scheduled reports, on-demand exports, and system audit trail

13.1 Running a Report

Step 1. Go to **Administration** → **Reports**.

Step 2. Choose a report type (e.g., Headcount, Leave Summary, Performance Scores, Payroll Summary).

Step 3. Set the date range or period.

Step 4. Click **Run Report** to generate immediately, or **Schedule** to automate it (daily/weekly/monthly) and add recipient email addresses.

Step 5. Click **Export** to download as PDF or Excel.

13.2 Audit Logs

The Audit Logs page records every user action in the system — logins, record edits, approvals, and deletions. Logs cannot be deleted and are essential for compliance audits.

- **Filter** by user, action type, date range, or module.
- **Export** the filtered log as CSV for external audit review.

CHAPTER 14

Troubleshooting & Quick Reference

Common issues, resolutions, and HR vs Developer responsibilities

14.1 Common Issues

Symptom	Likely Cause	Resolution
KPI value stays 0	Automated source not synced	Click ■ Sync Performance; confirm migrations deployed
Sales KPI = 0	Missing sales_rep_id link	Link staff to sales rep in Sales Reps admin UI
Old contacts not counted	created_by = NULL on old records	Dev must backfill; new contacts will auto-assign
Tickets miscounted	resolved_at column missing	Dev must apply migration; rerun sync
Score shows 0 after sync	Wrong period / month selected on goal	Edit goal → check Performance Period matches current month
Cannot create goal	No KPI templates exist	Go to KPI Library → Define New KPI first

14.2 HR Actions vs Developer Actions

Action	Who Does It
Create KPI templates	HR Admin (no code required)
Create & assign goals	HR Admin
Link staff to sales rep records	HR Admin / Sales Ops
Update manual KPI actuals	Manager or HR Admin
Trigger Sync Performance	HR Admin
Publish goals to staff	HR Admin
Run DB migrations (admins.sales_rep_id, etc.)	Developer / DBA
Deploy sync_goal_actuals engine	Developer
Configure nightly scheduler	Developer / DevOps
Backfill marketing created_by column	Developer
Add resolved_at to support_tickets	Developer

14.3 Department Alias Map

The portal maps several department name variants to canonical names when evaluating KPIs. Use the canonical name when creating departments to avoid mismatches.

Staff Department Name (variant)	Canonical KPI Department Name
Sales	Sales & Acquisitions
Acquisitions	Sales & Acquisitions
Sales and Acquisitions	Sales & Acquisitions
HR	Human Resources
H.R.	Human Resources
Ops	Operations
IT	Information Technology
Finance & Accounts	Finance
Accounts	Finance

14.4 Performance Score Calculation

The overall performance score is a weighted composite:

Component	Weight	Source
Goals Achievement (KPI Score)	40%	achievement_pct from staff_goals
Quality of Work	20%	Manager-entered quality score
Manager Review	40%	Manager review rating

■ Scores below 60 are flagged as 'At Risk' and may trigger an Improvement Plan.

14.5 KPI Achievement Status Reference

Status	Condition	Action Recommended
Achieved	achievement_pct $\geq$ 100%	Celebrate; consider bonus eligibility
On Track	75% $\leq$ pct < 100%	Monitor; check in at mid-month
At Risk	50% $\leq$ pct < 75%	Manager coaching; review obstacles
Behind	pct < 50%	Escalate; consider PIP if persistent

14.6 Quick-Action Cheat Sheet

Task	Navigation Path	Button
Invite a new employee	People & Org → Employees	Invite
Approve leave	Leave → Leave Requests	Approve / Bulk Approve
Create a KPI template	Performance → Goals & OKRs → KPI Library	+ Define New KPI

Task	Navigation Path	Button
Assign a goal	Performance → Goals & OKRs	Create & Activate Goal
Trigger KPI sync	Performance → Goals & OKRs	■ Sync Performance
Run payroll	Compensation → Payroll	Run Payroll
Post announcement	Engagement → Announcements	New Announcement
Create a contract	Documents → ■■ Contract Kitchen	New Contract
View audit log	Administration → Audit Logs	Filter / Export
Start offboarding	Administration → Exit & Offboarding	Start Offboarding
Change user role	Administration → Users	Change Role

This guide covers all modules available to HR Admins as of the current portal version. For questions about backend configuration or API integrations, contact your development team. For portal access issues, raise a ticket through Administration → Requests.
